SURFACE PULSED LPI RADAR

ALPER 200-N, is a low probability of intercept navigation radar system for detecting surface targets in all weather conditions and sea states, while not been detected by hostile ESM systems, featuring low power and special frequency-wave-form regime.

Technical Features

- X-Band
- Special Pulsed Waveform
- Frequency Hopping
- Solid State Transmit/Receive Modules
- 48NM Instrumented Range
- 1W-200W Peak Power
- 15m Range Discrimination
- ARPA Tracker with 100 Capacity
- (W)AIS Integration
- S57/S63 Chart Display
