

ASELSAN's KORKUT 8x8 to be unveiled at EUROSATORY 2024

ASELSAN is delighted to showcase its cutting-edge solutions and diverse product range at EUROSATORY 2024 between 17-21 June. KORKUT Air Defence Gun System, which is showcased integrated on an 8x8 vehicle for the first time at an exhibition abroad, will be at the spotlight.

ASELSAN, Türkiye's leading defence company, has been attracting attention both in Türkiye and internationally for its expertise and know-how in air defence domain. The company offers state-of-the-art products that provide layered and integrated air defence solutions adaptable to the evolving demands of the modern warfare.

KORKUT on Display Integrated on 8x8 Vehicle at Hall 6 Stand No: H26

The KORKUT Air Defence Gun System, one of the most remarkable air defence system designed and developed by ASELSAN, is the highlight of our exhibited systems at EUROSATORY as it is showcased integrated on an 8x8 vehicle for the first time at an exhibition abroad.

The system, already in the inventory of Turkish Armed Forces in a tracked vehicle configuration, can be adapted to meet changing operational needs, whether stationary, integrated on a tracked vehicle, or on an 8x8 vehicle. This adaptability allows it to perform more effectively in different geographies and challenging terrains.

About KORKUT:

It is an advanced air defence system designed for the effective air defence of mobile units and mechanized troops, featuring a stabilized and unmanned gun turret capable of firing on the move. Equipped with the ATOM 35 mm Airburst Ammunition firing power, which is also an ASELSAN product, KORKUT delivers effective defence against a range of threats including helicopters, aircraft, cruise missiles, air-to-ground missiles and unmanned aerial vehicles. KORKUT Air Defence Gun System provides the following solutions:

- Twin barrel 35 mm Gun Turret with fire speed of 2 x 550 rpm
- Effective use of Air Burst Ammunition against Fixed/Rotary Wing Aircrafts, Cruise Missiles, Air-to-Ground Missiles and Unmanned Air Vehicles (UAVs)
- Automatic Linkless Ammunition Feed Mechanism (ALAFM) which brings the unique capability of loading two different types of ammunition at the same time into the

magazine and makes it possible to change the type of ammunition to be fired within less than 15 seconds.

- Stabilized gun turret for target tracking and firing on the move
- Automatic Target Tracking with Integrated Tracking Platform including Tracking Radar and E/O Sensors

KORKUT Air Defence Gun System Command and Control Vehicle provides the following solutions:

- Target Acquisition & Tracking with 3D Search Radar
- Advanced Threat Evaluation and Weapon Assignment Algorithms
- Integrated IFF System
- Coordinated Operation with Higher Echelon C2 Units

About ASELSAN:

Established in 1975, ASELSAN is Türkiye's leading defence company with its nearly fifty years of expertise and expanding global presence. ASELSAN delivers innovative products, services, and system solutions to help its local and international clients to fulfill their critical missions. ASELSAN is specialized in advanced electronic systems for military and industrial customers in the fields of radar, electronic warfare systems, microelectronics guidance, electro-optics, information and communication technology, and defence system technologies. It also offers a wide range of solutions in civilian industries including transportation, security, energy, automation, and healthcare. Ranked by Defense News as the 47th largest defence company in terms of defence turnover, ASELSAN is dedicated to maintaining its steady growth by creating value in the global markets with its skilled workforce of over 10,000 employees.
