The risks which have been defined and prioritized in accordance with the opinion and suggestion companywide and in the scope of the operations carried out by the committee are explained below:

i. Difficulty to Increase the Number and Variety of Customers

World's leading defense industry companies, who provide the major portion of the defense needs of their country, lack of customer diversification caused by selling to mainly a single customer. The main client of the Company is the Public Institutions and Organizations, especially the Turkish Armed Forces. This situation is accompanied by the fact that the activities of the Company are generally directed towards the public demands of our country.

It is aimed to reduce this risk by working on increasing the sales abroad and carrying the existing know-how to the civilian sectors.

ii. Insufficiency in the Number of Qualified Subcontractors and Suppliers

The main contractor companies play an important part in providing deepening to the industry. To build an effective supply chain; the creation of qualified subcontractors/suppliers is highly critical in terms of sector productivity and sustainability. For the Company, which works with a large number of domestic and foreign suppliers and subcontractors, it is of utmost importance to ensure material quality and supply continuity.

Having a strong subsidiary infrastructure is among the elements that will support The Company's business continuity, steady growth and global competitiveness. Besides, development of local subsidiary industry which is especially competent, reliable and value-added in the direction of national and local product development vision is important. In order to reduce the risk arising from the failure of suppliers and subcontractors to achieve the required technical competence, expertise, quality and performance, the performance of suppliers is continuously measured and analyzed, and also to improve this performance, the Company supports, developments and implementations trainings and programs.

iii. Changes in the Global Economy and Defense Spending

Global economic variations have significant impacts on the economic activities of the countries and cause changes in projected defense budgets. This situation may bring along the risks of the demands of domestic and foreign customers lower from the expected level and also may affect the operational and functional indicators.

The current and potential economic developments, the countries which the Company have either collaborated or/and exported, and the effect of these matters on the company have been followed and the projection regarding global development have been planned.

Therefore, the adverse effects of the changes in financial markets on the Company's financial performance are minimized. Financial derivatives are also utilized to minimize the risks. Moreover, financial risk management techniques have been put into use in order to protect the return on the project from the effects of the inconsistency of cash inflows and outflows on the basis of currency which was formed within the projects and the deviation of the planned cash flow dates.

The Company's subsidiaries and affiliates utilize financial risk management within the scope of their own management policies.

i. Foreign Exchange Risk and Management Policy

The main principle of the foreign exchange management is to minimize the impact of the foreign exchange fluctuations by preventing foreign exchange short or long positions.

To define foreign exchange risks with taking the periodical foreign exchange position into consideration; loss and profits which would arise from upwards or downwards changes are calculated and the possible impacts of the foreign exchange risk incurred are measured. In this context, the possible changes in foreign currency-sensitive assets and liabilities for prospective interim financial periods are considered and the foreign currency position is estimated. The currency of the contracts signed between the company and its clients are mainly currencies other than the functional currency which is Turkish Lira. Advances can be made in different periods of the contracts so that the work can be carried out during the contracts, and the advances received can be in currencies other than the functional currency. All order advances taken and given apart from the functional currency are not subject to valuation according to the TAS 21 "The Effects of Changes in Foreign Exchange Rates Standard".

Due to the nature of the contracts, it is inevitable that there will be no change in the currencies during the term of the contract.
