A Front Runner in the Tactical Communication Field

ASELSAN is the global defense and technology company whose capability/portfolio in communication and information technologies sector comprises all the modern tactical communication requirements. The company provides state-of-the-art military communication technologies enabling user to access secure and robust network centric solutions in the tactical field.

The Software Defined Networking Radios (SDNRs) are the most important members of ASELSAN's communication solutions. They take the role of building the communication infrastructure to connect different systems in the tactical field and demonstrate force multiplier action for the armies. Being the top selling communication product family, SDNRs are used in more than 20 countries and integrated onto more than 100 platforms, proving ASELSAN's capability and experience in the communication field.

SDNRs are considered as a platform that hosts multiple number of waveforms addressing and fulfilling different requirements of tactical radio communication. SDNRs have contemporary, agile and intelligent waveforms supporting advanced networking features with cognitive features. On the other hand, they provide secure and resilient communication to the user with the high technological Electronic Counter Counter Measures (ECCM) on themselves.

ASELSAN is also one of the few companies that offers the capability of transferring the technology of developing and producing these SDNRs to strategic partner countries.

About ASELSAN:

As a global technology leader, we have established an organization that delivers new experiences to our users all across the world. By investing into our highly diversified human asset, we keep growing in a sustainable and inspiring fashion.

A journey began with a radio communication device today took us to more than 500 various products and solutions that changed "status quo ante" in defense and security arena. Our ambitious global expansion strategy made us embracing investment opportunities in promising markets.

With the inspiration of our clients in more than 80 countries, we start every new day with new ideas and dreams that encourages us to challenge technology boundaries. Striving for a better planet is our endless motivation.

Note: For more information regarding the product, please visit our booth at the IDEF 2023.
