HEADSET & HELMET UNITS HEADSET AND EARPHONE-MICROPHONE SET

The supply voltage is 18 V. It is fed from the unit to which it is connected. The components are microphone/headset set, helmet, and spiral connection cable. The microphone/headset has a 3-Position switch with positions such as Intercom, Microphone Off (The Microphone is turned off but the Headset is on.) and PTT. The inner part of the ZAMBAK headset can be used with or without the helmet; it is connected to the system via cable.

General Features

- Shock preventive softliner
- Adjustable fixing straps
- Compatible with composite ballistic helmet
- Compatible with ASELSAN M983, ANPVS 7 B night vision systems
- Weight: 1000 gr
- Compatible with MIL-STD-810G
- NIJ STD 0101.04 level III-A ballistic protection (9 mm parabellum FMJ minimum 436 m/sec)
- Compatible with MIL-STD-662F V50 particle test standard (STANAG 2920 1.1gr/17 grain FSP minimum 650 m/sec)
- NIR (near infra red) reflection

Accessories

- Hairnet for composite ballistic helmet
- Ballistic goggle (yellow, green, and transparent glassess)
- Bag for transportation & protection
- Spiral cable and adapter cable assemblies

Functional Features

- Communication via ASELSAN Internal Communication Systems in the armored vehicle.
- Communication via ASELSAN 4600, 9600, 9651, 9661, 5712, 4014, 4411, 4711 radios outside the armored vehicle
- Active noise reduction and passive noise reduction (up to 40 dB noise reduction)
- Allows hearing of ambient sound
- Compatible with M25A1, SR10 and SR6M portable gas mask
- Connectable to gas particle filter
- Emergency release socket
