KORKUT SSA

SELF PROPELLED AIR DEFENSE GUN SYSTEM

KORKUT Air Defense Gun System is developed for the effective air defense of mechanized troops and mobile units. System has firing on the move capability with the stabilized and unmanned gun turret. KORKUT Gun System has capability of firing 35 mm Airburst Ammunition - which is also a product of ASELSAN - in addition to conventional type 35 mm ammunitions. KORKUT Gun System-together with 35 mm Airburst Ammunition- highly improves the effectiveness of ground based air defense against modern air threats including air-to-ground missiles, cruise missiles and UAVs.

KORKUT SSA

Self Propelled Air Defense Gun System

General Specifications of KORKUT Self Propelled Air Defense Gun System are

- 35 mm Gun Turret with fire speed of 2 x 550 rpm
- Effective use of Air Burst Ammunition against Fixed/Rotary Wing Aircrafts, Cruise Missiles, Air-to-Ground Missiles and Unmanned Air Vehicles (UAVs)
- Automatic Linkless Ammunition Feed Mechanism (ALAFM) which brings the unique capability of loading two different types of ammunition at the same time into the magazine and makes it possible to change the type of ammunition to be fired within less than 15 seconds.
- Stabilized gun turret for target tracking and firing on the move
- Automatic Target Tracking with Integrated Tracking Platform including Tracking Radar and E/O Sensors
- High performance Fire Control Radar and Electro/Optical Sensors
- Coordinated Operation with Higher Echelon C2 Units.
