MULTI-STORES CARRIAGE
HIGH RELIABILITY

SADAK-4T

SMART PNEUMATIC QUAD RACK

SADAK-4T carriage system is the first domestic multi-stores carriage system in Türkiye. The system could carry and eject 250 lb. TOLUN or TOLUN-IIR which are GPS/INS/IIR small guided munitions. The system is compatible with combat aircrafts and unmanned aerial vehicles and increasing the platform's weapons carriage capability in per sortie.

Main Specifications

- Smart store management
- Platform could carry four smart guided air to surface bombs
- Pneumatic ejection technology
- Low operational and life cycle cost
- Low maintenance
- Easy platform/store integration

Technical Specifications

- Payload Capacity : Four 250 lb. TOLUN/TOLUN-IIR
- Ejection : Pneumatic
- Weight : 175 kg (empty), 731 kg (loaded)
- Dimensions : 3210 mm x 356 mm x 212 mm
- Compatible with 14" and 30" lug interface

Platform

- F-16 and Akıncı (certified)
- Potential Platforms : TF-X, Hürjet, Kızılelma, Anka-3
