UNMANNED TURRET

ASELSAN SARP 200/30 unmanned turret is developed primarily against armored land targets and becomes a perfect match for integration onto tactical vehicles. While it can be mounted on 6x6 and 8x8 wheeled or tracked vehicles, it steps further by its indigenous design.

Through its extensive surveillance and remote control capabilities, SARP 200/30 enhances situational awareness of the gunner in his proximity while the vulnerability to attacks is decreased drastically.
