ZIPKIN | 100T

LIGHTWEIGHT TORPEDO LAUNCHER

System Capabilities

- Launching NATO Standard lightweight torpedoes (Mk 44 /Mk 46/ Mk 54) using high pressure air
- Transmitting preset functions from the fire control system to torpedo
- Integration to Combat Management System
- Different operation modes for controlling either remotely or locally (in case of emergency)
- Electrically simulation capabilities with Test Unit in order to training and fault detection
- Cold weather protection on barrels
- Configurable mounting interface for different surface vessels
- Simplified operation and maintenance

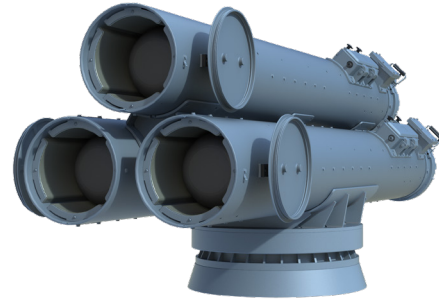

System Components

- Triple Barrel Torpedo Tube (Starboard and Port)
- Power Distribution Unit (Starboard and Port)
- Buzzer (Starboard and Port)
- Torpedo Test Unit
- Torpedo Handling Set

Technical Specifications

- Torpedo Launching Capability : Mk 44, Mk 46, Mk 54
- High Pressure System : 1500±150 PSI
- Cold Weather Protection : Barrel Heater

Specifications are subject to change without any notice. | All tolerances are within ±10%.
