## SUSTAINABLE CLIMATE CHANGE POLICY

We commit;

- To carry out our activities with our high technology, human assets and strong know-how in a structure that is sensitive to climate change and sustainability and integrated into our corporate strategies,
- To identify and manage our risks and opportunities in compliance with legal and other requirements with our perspective that takes into account the carbon, water, biodiversity and other sustainable environmental dimensions and impacts of our products and services,
- To carefully monitor sustainability programmes developed nationally and internationally, to follow sustainability objectives and to create sustainability added value and ESG (environmental, social, and governance) performance at the highest level in line with our targets,
- To establish, develop and ensure the continuity of a strong climate change management system in which our entire value chain contributes to the implementation and development by taking into account the needs and expectations of the relevant parties with the leadership of our senior management and the participation of our ASELSAN family,
- To monitor our greenhouse gas emissions to reduce the effects of global climate change, report transparently and work towards decarbonisation throughout the product life cycle,
- To create and continuously improve our strategy and roadmap with the use of renewable energy and other sustainability solutions within the scope of our net zero emission target,
- To contribute to the conservation of biodiversity, to work for ending deforestation, afforestation and reforestation,
- To create value in strengthening scientific and technological capacities by cooperating with our stakeholders such as suppliers, institutions, universities, etc. without seeing the risk of climate change only as our own risk,
- To ensure that our ASELSAN family has a strong climate change and sustainability awareness and that our sustainable climate change policy is adopted as a common responsibility,
- To see the environment as a trust to be passed on to future generations.
