INS/ GNSS GUIDED ALLUP ROUND MUNITION

TOLUN is a INS/GNSS guided gliding all up round ready 250 lb. weapon system carried on Smart Pneumatic Quad Rack (SPQR) (SADAK-4T).

TOLUN is designed to maximize the number of weapons that can be loaded per aircraft. Additionally, it can be deployed and utilized in a standalone configuration, designated as TOLUN-SI due to mounting interface difference.

The TOLUN features an advanced penetration warhead designed to effectively defeat both armored and non-armored targets. Capable of penetrating up to 1 meter of reinforced concrete, the hardened nose cone ensures maximum effectiveness against even the toughest targets. The system offers a delayed initiation mode via a fuse that is equipped with electronic safety and cockpit-programmable functionality, allowing precise control over detonation timing for diverse mission requirements.

With its cutting-edge technology, high targeting precision and offering low collateral damage, TOLUN provides a reliable solution for a wide range of operational needs.

Main Specifications

- Launchable up to 4 in ripple release against single or multiple targets in one sortie
- High precision and low collateral damage
- Extended range with diamond shaped wings
- All-weather conditions
- Day/night operations
- Prosecute targets of opportunity
- Integrated GNS/INS navigation
- Resistant to jamming threat with 4-channel CRPA antijam antenna
- Embedded spoofing resistance software
- Re-targeting during captive flights
- Waypoints tracking
- Selectable impact angle in advance
- Low operational and life cycle cost
- High reliability and low maintenance
- Can be launched from internal weapon bay
- Combat proven

Technical Specifications

• Range	: ≤ 55 NM (102 km) (Fighter) ≤ 31 NM (57 km) (UAV)
• Altitude	: 0- 40.000 ft (MSL) (Fighter) 0- 30.000 ft (MSL) (UAV)
• Accuracy (CEP)	: < 30 ft (10m)
• Guidance	: INS/GPS
• Warhead Weight	: 105kg
• Carriage/Release	: Quad (SADAK 4T) (TOLUN) Dual (SADAK 2T) (TOLUN) Single (TOLUN SI)
• Warhead	: Penetration

Physical Specifications

• Weight (including bomb)	: 136 kg
• Length	: 1800 mm x 191mm x 253 mm
• Diameter	: 164mm

Certified Platforms

- F-16, AKINCI, ANKA-III, BAYRAKTAR TB2/TB3
